SPANNERS

QUAD DRIVE RING OPEN END

SP Tools patented **QUAD DRIVE** open end offers 4 times the gripping power of a standard ROE spanner by wrapping around the fastener and maximising the contact on the flat sides of the fastener head, not the points.

SP10017

DOUBLE RING

SP **DOUBLE RING** end spanners feature flat drive ring ends, making them the perfect spanner for getting to and loosening those tricky, hard to reach, often worn fasteners by increasing the contact area with the nut or bolt head. Greater offsets allows users to work quickly and efficiently in tight spaces.

FLEX HEAD GEAR DRIVE

SP Tools patented **FLEX HEAD GEAR DRIVE** spanners allow for more than 180 degrees bend, allowing you to loosen or tighten nuts & bolts in hard to reach, confined areas. Precisely machined with deeper gears for greater torque loading and reliability with 72 teeth that only require 5° of space per turn. The ratchet head allows the spanner to travel without having the need to remove the spanner from the fastener.
