FLAT DRIVE TECHNOLOGY

Perfectly flat spanner head surfaces allow for maximum contact between the spanner and the bolt or nut, maximising grip and enhancing applied torque.

SP FLAT DRIVE SPANNER HEAD

REGULAR CONTACT AREA

MAXIMUM CONTACT

Spanner heads make contact on the flat sides of the fastener head, not the points.

QUAD DRIVE OPEN END

SP Tools patented QUAD DRIVE open end offers 4 times the gripping power of a standard ROE spanner by wrapping around the fastener and maximising the contact on the flat sides of the fastener head, not the points.
